| <b>PERIOD:</b>         | 1996                             |
| <b>VALUE OF WORKS:</b> | \$120,000.00                     |

### **DETAILS:**

The works involved the excavation, formwork, reinforcement and placement of many mass concrete footings with holding down bolts for various structures. Placement of a rock pavement over the site, compaction and leveling, electrical works, electrical cable pits and ducts in reinforced concrete were parts of the works. Large footings for 12m high concrete poles were also excavated and constructed.
